Philippines

My Observed Weather

Due to typhoon Enteng, and southwest monsoon affecting the Philippines I also observed moderate to heavy rain all throughout the day, in our area, Antipolo City. I felt that the temperature might be lower than the reported but overall, I think the weather forecast for the day is overall accurate.

Philippines

My Observed Weather

Similar to yesterday due to ongoing effects of typhoon Enteng, and southwest monsoon, our area experienced moderate to heavy rains. Due to nonstop rain as well it some areas experience flooding. Aside from the air felt a little humid, overall the forecast is accurate.

Philippines

My Observed Weather

Our area is still cloudy with occasional showers. Even though typhoon Enteng is still in the Philippine area of responsibility it causes a little rain today in our area, except it is still covered with dark clouds. Sometimes the Sun shines in our area for very brief time, but the forecast was still accurate for the day.

Philippines

My Observed Weather

Even though the sky is still covered with dark clouds in our area, I did not observed any rain for the day. The Sun also sometime shines in our area. Overall, I think the weather report is accurate for the day.

Philippines

My Observed Weather

I observed a little shower in the afternoon. Though the weather I observed in our area is overall, cloudy with some Sunshine. I think that the temperature is a bit lower, since it feels cooler, but overall I think the weather report is still not far from accurate.

Philippines

My Observed Weather

It is both cloudy, and Sunny day. Contrast to the expected precipitation for the day it only showered very little in our area. Overall, I think the weather report for today is a little far from accurate, or maybe the precipitation is concentrated in a specific area in Antipolo city.

Philippines

My Observed Weather

It is reported that moderate to intense rain may happen from enhanced southwest monsoon. It is very cloudy in our area throughout the day with the burst of rain happening in the evening. Overall the report I think is very accurate since it does rain intensely in our area.

Philippines

My Observed Weather

All throughout the day the sky is covered with dark clouds in our area. In the afternoon a sudden burst of heavy rain that lasts quite long occurred. Overall, I think the weather report today is accurate since even though it rained intensely it only last a couple of hours.
